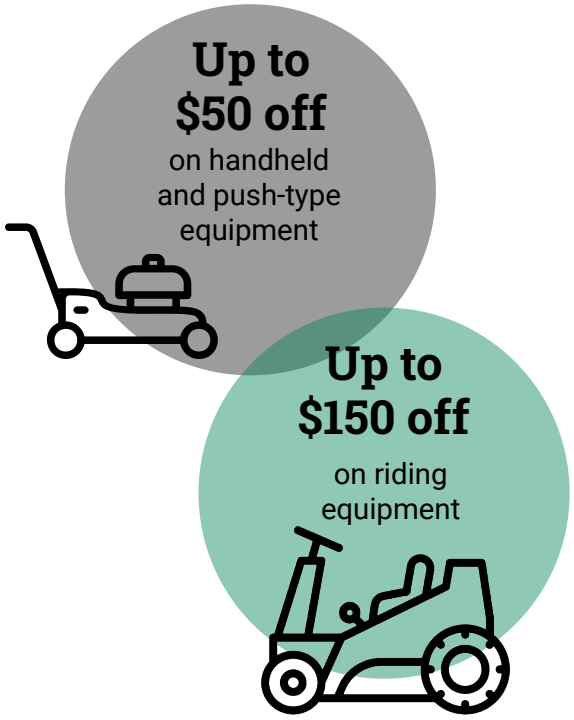
Residential Electric Outdoor Equipment

Decatur County REMC

What tools are better for the environment, requires no fuel or additives and very little maintenance? You guessed it, electric outdoor tools. Electric outdoor tools have been proven to reduce carbon footprint and keep the air we breathe free from emissions. Electric outdoor equipment also has fewer moving parts than gas-powered equipment which helps it weigh less with less maintenance. With the advances in lithium-ion battery technology, electric outdoor equipment can run longer and stronger than years before.



Decatur County REMC is offering its residential member-consumers the opportunity to apply for an electric outdoor equipment incentive. Products include: electric lawnmowers, leaf blowers, trimmers, chain saws, snowblowers, rototillers and power washers. Where you choose to buy your equipment and the brand you choose is up to you.

Simply fill out an application and submit with your receipt to take advantage of:
- 50% off UP TO $50 on hand-held and push type equipment
- 50% off UP TO $150 on riding equipment

Required Field

I understand and agree to the following terms:

Limit two rebates per member-consumer account per year. Equipment purchased must be new and have a minimum one-year warranty. Outdoor power combo kits are treated as a single purchase and eligible for one rebate. Equipment must be 100% battery and/or plug-in electrical equipment. Reconditioned or refurbished equipment is not eligible. Completed application and receipt/invoice must be received within 90 days of purchase date or within same program year. Incentives for qualifying purchase are the lesser of $50/$150 or 50% of purchase price not including tax. The cooperative has the right to deny incentive if terms and conditions are not met.
